DESCRIPTION

5

IMAGE SUPPLY DEVICE, RECORDING SYSTEM, AND
CONTROL METHOD THEREFOR

TECHNICAL FIELD

10 The present invention relates to an image supply
device such as a digital camera, a recording system,
and a control method therefor.

BACKGROUND ART

15 In recent years, digital cameras (image sensing
devices) which can sense images and convert them into
digital image data by simple operations have been
prevalent. When an image sensed by such a camera is
printed and used as a photo, it is a common practice to
20 temporarily download the sensed digital image data from
a digital camera to a PC (computer), execute an image
process by the PC, and output the processed image data
from the PC to a color printer, thus printing an image.

By contrast, for example, a color print system
25 which allows a digital camera to directly transfer
digital image data to a color printer without the
intervention of any PC and can print it out, a
